PRIORITY SNAPSHOT

- Schema LocalBusiness (2) Required Fields: Missing required fields: address
- Custom 404 Page: Soft 404: a made-up URL (https://avlive.com.pk/seochecker-404-check-eddae2c0be79dbbc) returned 200, so missing pages look like real ones and Google may index error pages.
- Redirect Consistency: Some variants do not redirect to the same final URL. Consolidate redirects so all variants resolve to one canonical version.

Priority fixes

What to fix first

Issues are ordered by severity. Each item includes the recommended next action.

CRITICAL

1. Schema LocalBusiness (2) Required Fields

`structuredData`

Missing required fields: address

RECOMMENDED ACTION

Fix the Schema LocalBusiness (2) Required Fields issue to improve your SEO.

CRITICAL

2. Custom 404 Page

`domainHealth`

Soft 404: a made-up URL (https://avlive.com.pk/seochecker-404-check-eddae2c0be79dbbc) returned 200, so missing pages look like real ones and Google may index error pages.

RECOMMENDED ACTION

Return a real 404 status for missing pages, with a helpful page that links back into the site.

WARNING

3. Redirect Consistency

`canonicalAudit`

Some variants do not redirect to the same final URL. Consolidate redirects so all variants resolve to one canonical version.

RECOMMENDED ACTION

Standardize redirects so all variants resolve to a single final URL.

WARNING

4. Response Time

`server`

HTML response is slow (0.98s). Target: under 0.4s

RECOMMENDED ACTION

Improve server response time with caching, a CDN, or faster hosting - aim for under 0.4 seconds.

Priority fixes

WARNING

5. Compression

`server`

HTML is served uncompressed. Compression typically cuts HTML transfer size by 70-80%

RECOMMENDED ACTION

Enable Brotli or gzip compression on your server or CDN. HTML usually shrinks by 70-80%, which speeds up every page view.

```
# Nginx
gzip on;
gzip_types text/html text/css application/javascript;
```

WARNING

6. DKIM

`emailAuth`

Selector "google" exists but its public key is empty, which marks the key revoked. Selector "selector1" exists but its public key is empty, which marks the key revoked. Selector "selector2" exists but its public key is empty, which marks the key revoked. Selector "k1" exists but its public key is empty, which marks the key revoked. Selector "s1" exists but its public key is empty, which marks the key revoked. Selector "s2" exists but its public key is empty, which marks the key revoked. Selector "dkim" exists but its public key is empty, which marks the key revoked. Selector "default" exists but its public key is empty, which marks the key revoked. Selector "mail" exists but its public key is empty, which marks the key revoked. Selector "zoho" exists but its public key is empty, which marks the key revoked.

RECOMMENDED ACTION

Turn on DKIM signing in each service that sends mail for your domain and publish the key it gives you.

WARNING

7. Schema Context

`structuredData`

Structured data should include @context pointing to schema.org

RECOMMENDED ACTION

Ensure your structured data includes @context pointing to schema.org.

WARNING

8. Technology Disclosure

`server`

Response headers disclose server technology (X-Powered-By: Express). This helps attackers target known vulnerabilities

RECOMMENDED ACTION

Configure your server to remove the X-Powered-By header and version numbers from the Server header.

```
# Apache (httpd.conf)
ServerTokens Prod
Header unset X-Powered-By
```

Priority fixes

INFO

9. HSTS

server

No Strict-Transport-Security header. Browsers may still try HTTP first on a first visit

RECOMMENDED ACTION

Send a Strict-Transport-Security header with a max-age of at least six months so browsers always use HTTPS.

```
Strict-Transport-Security: max-age=31536000; includeSubDomains
```

INFO

10. Security Headers

server

Missing security headers: X-Content-Type-Options: nosniff, frame protection (X-Frame-Options or CSP frame-ancestors), Referrer-Policy

RECOMMENDED ACTION

Add the missing security headers (X-Content-Type-Options, frame protection, Referrer-Policy) in your server or CDN config.

```
X-Content-Type-Options: nosniff
Content-Security-Policy: frame-ancestors 'self'
Referrer-Policy: strict-origin-when-cross-origin
```

INFO

11. Analytics

technical

No analytics tool found in the HTML. Tools injected later by a tag manager or consent banner may not be visible in the HTML

RECOMMENDED ACTION

Install an analytics tool (GA4, Plausible, Cloudflare Web Analytics or similar) so you can measure what search traffic does on the page.

Checks by category

Complete audit detail

Pass, review and fix states match the Results page and preserve the measured values.

Basic Meta Tags

5 pass / 0 review / 0 fix

100%

PASS

Title Tag

Title fits Google's display width (~435px of 580px, 45 characters)

```
Measured: Video Conference | Event Management | AV Live
```

PASS

Meta Description

Description fits Google's display width (~894px of 1000px, 145 characters)

```
Measured: AV Live is Pakistan's premier Video Conference & Event Management company.
Shop Poly, Logitech & Cisco AV or book 3D hologram & corporate events.
```

PASS

twitter:creator is properly formatted

```
Measured: @avlivepk
```

Structured Data

2 pass / 1 review / 1 fix

64%

PASS

Structured Data Validity

All JSON-LD scripts have valid JSON syntax

PASS

Schema Type

Found 5 schema type(s): Organization,Corporation, LocalBusiness, FAQPage, OfferCatalog, Service

```
Measured: Organization,Corporation, LocalBusiness, FAQPage, OfferCatalog, Service
```

Structured Data

FIX

Schema LocalBusiness (2) Required Fields

Missing required fields: address
Expected: Required fields: name, address

REVIEW

Schema Context

Structured data should include @context pointing to schema.org
Expected: @context: "https://schema.org"

Technical SEO

10 pass / 1 review / 0 fix

99%

PASS

HTML Language

HTML lang attribute is present (en)
`Measured: en`

PASS

Favicon

Favicon is present
`Measured: data:image/svg+xml,<svg xmlns='http://www.w3.org/2000/svg' viewBox='0 0 100 100'><rect width='100' height='100' fill='%231A2B4C'/><text y='70' x='10' fill='white' style='font: bold 60px sans-serif;'>AV</text></svg>`

PASS

HTTPS

Website uses HTTPS
`Measured: HTTPS`

PASS

Robots Meta

Robots meta tag is configured
`Measured: index, follow, max-image-preview:large, max-snippet:-1, max-video-preview:-1`

PASS

X-Robots-Tag

No X-Robots-Tag restrictions

Technical SEO

PASS

Mobile Responsive

Viewport configured for mobile devices

`Measured: width=device-width, initial-scale=1.0, maximum-scale=5.0, user-scalable=yes`

PASS

Robots.txt

robots.txt found and readable

PASS

Search Engine Access

Google and Bing crawlers are allowed

PASS

AI Search Visibility

Open to AI search crawlers (ChatGPT, Claude, Perplexity)

PASS

XML Sitemap

Sitemap declared in robots.txt (https://avlive.com.pk/sitemap.xml)

`Measured: https://avlive.com.pk/sitemap.xml`

REVIEW

Analytics

No analytics tool found in the HTML. Tools injected later by a tag manager or consent banner may not be visible in the HTML

Expected: An analytics tool such as GA4, Plausible or Cloudflare Web Analytics

Canonical / Redirect Audit

2 pass / 1 review / 0 fix

86%

PASS

Single Canonical Version

All variants resolve to a single final URL (https://avlive.com.pk/).

Expected: Only one variant returns 200; all other variants redirect to it.

Canonical / Redirect Audit

REVIEW

Redirect Consistency

Some variants do not redirect to the same final URL. Consolidate redirects so all variants resolve to one canonical version.

Expected: All variants resolve to the same final URL.

PASS

Canonical Tag

rel="canonical" is present and matches the served URL.

`Measured: https://avlive.com.pk/`

Expected: rel="canonical" points to the served URL.

Page Quality

7 pass / 0 review / 0 fix

100%

PASS

Word Count

Page has a healthy amount of text (333 words)

`Measured: 333`

PASS

Title Words in Body

Title words are used in the page text (5 of 5)

PASS

Placeholder Text

No placeholder text found

PASS

Image Alt Text

No images on the page to check

PASS

Mixed Content

All assets load over HTTPS

PASS

Email Address Exposure

No plain-text email addresses found

Page Quality

PASS

Text to HTML Ratio

Text to HTML ratio is healthy: 11.6% (2 KB text / 20 KB HTML)

```
Measured: 11.6% (2 KB text / 20 KB HTML)
```

Page Structure

4 pass / 0 review / 0 fix

100%

PASS

H1 Heading

Exactly one H1 heading found

```
Measured: Video Conference | Event Management | AV Live
```

PASS

Heading Hierarchy

Heading levels follow a clean hierarchy

PASS

Empty Headings

No empty headings

PASS

Duplicate Headings

All headings are unique

Link Structure

4 pass / 0 review / 0 fix

100%

PASS

Internal Links

29 internal links found

```
Measured: 29
```

PASS

External Links

No external links found

```
Measured: 0
```

Link Structure

PASS

Anchor Text Quality

All links have descriptive anchor text

PASS

Underscores in URLs

URLs use no underscores

Server & Performance

4 pass / 4 review / 1 fix

55%

REVIEW

Response Time

HTML response is slow (0.98s). Target: under 0.4s

`Measured: 0.98s`

Expected: Under 0.4 seconds

PASS

HTML Size

HTML document size is reasonable (20 KB)

`Measured: 20 KB`

REVIEW

Technology Disclosure

Response headers disclose server technology (X-Powered-By: Express). This helps attackers target known vulnerabilities

Expected: Remove X-Powered-By and version numbers from the Server header

FIX

Compression

HTML is served uncompressed. Compression typically cuts HTML transfer size by 70-80%

`Measured: none`

Expected: gzip or Brotli

REVIEW

HSTS

No Strict-Transport-Security header. Browsers may still try HTTP first on a first visit

Expected: Strict-Transport-Security: max-age=31536000

Server & Performance

REVIEW

Security Headers

Missing security headers: X-Content-Type-Options: nosniff, frame protection (X-Frame-Options or CSP frame-ancestors), Referrer-Policy

Expected: X-Content-Type-Options, frame protection and Referrer-Policy

PASS

Render-Blocking Scripts

No render-blocking scripts in the <head>

PASS

Asset Count

Asset count is reasonable (1 stylesheet, 1 script)

`Measured: 1 stylesheet, 1 script`

PASS

Inline Styles

Inline style attributes are limited (2)

`Measured: 2`

HTML Markup

7 pass / 0 review / 0 fix

100%

PASS

Head Integrity

The <head> contains only head elements and every SEO tag is inside it

PASS

Duplicate Head Tags

Title, meta description, canonical, viewport and charset each appear at most once

PASS

Doctype

HTML5 doctype declared

`Measured: <!doctype html>`

PASS

Duplicate IDs

Every id attribute is unique

HTML Markup

PASS

Nested Links

No links are nested inside other links

PASS

Plugin Content

No Flash, Java or Silverlight content

PASS

Iframes

No iframes on this page

Broken Links

1 pass / 0 review / 0 fix - not counted in the overall score

100%

PASS

Broken Links

No broken links among the 29 checked.

```
Measured: 29 of 29 links checked
```

Email Authentication

2 pass / 1 review / 0 fix - not counted in the overall score

83%

PASS

SPF Record

SPF record published. 1 of the 10 permitted DNS lookups used. "~all" is a soft fail - the common setting while a sending set is still being confirmed.

```
Measured: v=spf1 include:_spf.mx.cloudflare.net ~all
```

PASS

DMARC Policy

"p=reject" tells receivers to refuse mail that fails authentication. No "rua" address, so aggregate reports are not being collected and failures cannot be seen.

```
Measured: v=DMARC1; p=reject; sp=reject; adkim=s; aspf=s;
```

Email Authentication

REVIEW

DKIM

Selector "google" exists but its public key is empty, which marks the key revoked. Selector "selector1" exists but its public key is empty, which marks the key revoked. Selector "selector2" exists but its public key is empty, which marks the key revoked. Selector "k1" exists but its public key is empty, which marks the key revoked. Selector "s1" exists but its public key is empty, which marks the key revoked. Selector "s2" exists but its public key is empty, which marks the key revoked. Selector "dkim" exists but its public key is empty, which marks the key revoked. Selector "default" exists but its public key is empty, which marks the key revoked. Selector "mail" exists but its public key is empty, which marks the key revoked. Selector "zoho" exists but its public key is empty, which marks the key revoked.

```
Measured: google._domainkey: v=DKIM1; p= | selector1._domainkey: v=DKIM1; p= |
selector2._domainkey: v=DKIM1; p= | k1._domainkey: v=DKIM1; p= | s1._domainkey: v=DKIM1;
p= | s2._domainkey: v=DKIM1; p= | dkim._domainkey: v=DKIM1; p= | default._domainkey:
v=DKIM1; p= | mail._domainkey: v=DKIM1; p= | zoho._domainkey: v=DKIM1; p=
```

Domain & Error Pages

0 pass / 0 review / 1 fix - not counted in the overall score

0%

FIX

Custom 404 Page

Soft 404: a made-up URL (https://avlive.com.pk/seochecker-404-check-eddae2c0be79dbbc) returned 200, so missing pages look like real ones and Google may index error pages.

```
Measured: 200
```

Expected: A 404 status with a page that links back into the site

Canonical route detail

How each primary URL variant responded during this scan.

525	https://www.avlive.com.pk/
200	https://avlive.com.pk/
525	https://www.avlive.com.pk/
200	https://avlive.com.pk/
